CREATIVE OPERATIONS

Visual Identity Guidelines

The design language of a studio-running OS — extracted from the source.

Logo & Wordmark

THE MARK

OBSERVED

A single **C** glyph, Hanken Grotesk bold, set white on the violet gradient square. A top highlight + bottom shadow give it a tactile, slightly raised face.

WORDMARK

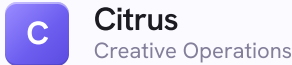

OBSERVED

Citrus

Hanken Grotesk · Semibold (600) · tracking -0.02em.
Lowercase after the cap. Pairs with the eyebrow tagline below it.

LOCKUP — AS SHIPPED IN THE SIDEBAR

OBSERVED

ANATOMY

OBSERVED

Container	32px · radius 6
Fill	135° · #9a8cff→#6d5ef0→#5b4ce0
Glyph	Hanken · 700 · #fff
Inset	+45% top · -12% bottom

DO & DON'T

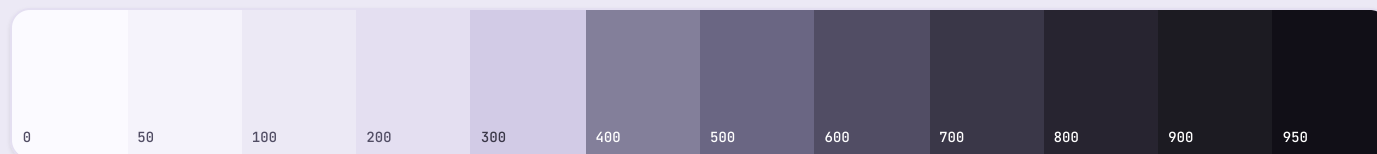

RECOMMENDED

- ✓ Keep the gradient direction at 135°
- ✓ Clearspace ≥ the cap-height around the mark
- ✗ Recolor the glyph or flatten the gradient
- ✗ Set the wordmark in any face but Hanken

No raster/vector asset ships. The mark is drawn in CSS (gradient + inset shadow), so it is resolution-independent. There is no favicon or logo file in the repo — this lockup is the source of truth.

Color

NEUTRAL RAMP — LAVENDER-TINTED OBSERVED

Faint purple undertone (blue > red > green). Every surface, border and text color is drawn from this single ramp — the brand lives in the neutrals, not only the accent.

ACCENT — SOFT VIOLET OBSERVED

accent

#6d5ef0

Brand · primary CTA

hover

#5b4ce0

Pressed state

accent-fg

#ffffff

Ink on violet

ACCENT RESTRAINT OBSERVED

- ✓ Brand mark · active nav · primary buttons · focus rings
 - ✗ Status badges — these use the semantic palette
 - ✗ Panel borders, hover wells, info chips
- Monochrome accent. No second pop colour.

SEMANTIC STATE — FOUR TIERS EACH (TEXT · MID · BG · BORDER) OBSERVED

WORKSPACE

Source-of-truth note. Components render through Tailwind's `fontSize` scale (40/28/22/18/15/13/12) — which matches `BRANDING.md`. The `--text-*` CSS variables in `globals.css` (30/24/19/16/14...) are **not consumed by any component** and read as stale. Treat Tailwind as authoritative.

RECOMMENDED reconcile the two.

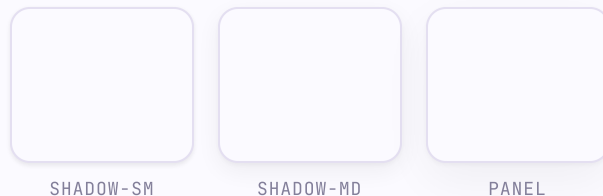

Surfaces & Elevation

LAYERING — DESK TO SURFACE OBSERVED

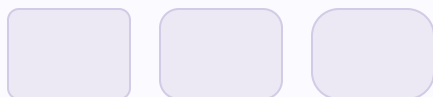

desk n-100 → app n-50 → panel n-0. Panels float on the desk.

ELEVATION TIERS OBSERVED

Borders carry most of the depth; shadows add a faint lift. Floating panels use the soft two-stop panel shadow.

RADII OBSERVED

SM · 6

MD · 10

LG · 14

sm: buttons/inputs/pills · md: cards/dialogs · lg: large panels.

BORDERS OBSERVED

Default dividers use line; inputs & empty-states step up to strong.

GRADIENTS & SHEENS OBSERVED

BRAND-MARK

UPNEXT-GLOW

In progress

BADGE SHEEN

The brand-mark gradient (135°) is the only chromatic gradient. The up-next card glows violet in its bottom-right corner; pills carry a low-opacity white sheen for depth without an outline.

Components

BUTTONS

OBSERVED

Primary

Outline

Ghost

Danger

Height 36 (md) / 32 (sm) · radius 6 · medium weight. Primary fills accent with a 1px inner sheen; press scales to 0.98.

INPUTS & FOCUS

OBSERVED

Placeholder text

Focused — violet ring

Border strong → accent on focus, with a ring-accent/25 halo. Errors swap to the danger border + ring.

STATUS BADGES — SEMANTIC, NEVER ACCENT

OBSERVED

Mono campaign	Completed	\$31,200

DIALOG & EMPTY STATE

OBSERVED

New project

Cancel

Create

No tasks yet

Dashed border · centered · muted icon well.

Motion & Spacing

DURATION SCALE

OBSERVED

100ms		button press (scale 0.98)
120ms		tooltip fade-in
150ms		card hover-lift
200ms		nav rail slide
220ms		page-enter · drawer-in
600ms		flash-saved ring
700ms		stacked-bar expand

EASING

OBSERVED

standard `cubic-bezier(.4,0,.2,1)`
page-enter · bar-expand

drawer `cubic-bezier(.32,.72,0,1)`
mobile drawer in

ease / ease-out
hovers · rail · flash

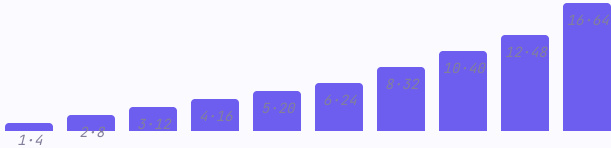

REDUCED MOTION

OBSERVED

A global `prefers-reduced-motion` query collapses every animation and transition to `0.01ms` — page-enter, flash-saved, the rail slide, bar-expand and drawers all neutralise. Motion is decorative, never load-bearing.

SPACING — 4PX BASE, GAPS SKIPPED ON PURPOSE

OBSERVED

No 7 · 9 · 11 — the gaps keep vertical rhythm tight. Layout dims: sidebar 248 · topbar 60 · gutter 20 · content max 1200 · reflow at 880px.

Principles

CHARACTER

Calm

Quiet neutrals; the accent earns attention by being rare.

Premium

Lavender off-whites, soft elevation, tactile sheens.

Precise

Tight tracking, dense scale, no bounce — Linear-grade.

TOKEN CHEAT-SHEET

space 4•8•12•16•20•24•32•40•48•64
font Hanken Grotesk • JetBrains Mono

FINDINGS — RECONCILE RECOMMENDED

- 1. --text-* & --radius-* vars in globals.css (30/24/19; 6/8/12) are unused — Tailwind's scale (40/28/22; 6/10/14) renders. Delete or sync the vars.
- 2. .brand-mark-gradient comment says "chartreuse" — the gradient is violet. Stale from a prior pass.
- 3. Foundation --accent = n-900; the Soft Violet block overrides it. Comment the block out for a grayscale fallback.

SOURCES — GROUNDED IN THE REPO

app/globals.css — tokens, ramp, brand pass, dark theme, animations, reduced-motion
tailwind.config.ts — rendered type scale, radii, color & spacing utilities
BRANDING.md — brand narrative, accent restraint, badge weights
app/layout.tsx — font loading (Google Fonts CSS2)
components/sidebar.tsx — wordmark lockup & the C mark
components/ui/ — button • input • badge • dialog • table • empty-state
